

# Cosmetic body contouring with Vaser Pro

Beauty has its own definition for every individual. While one should be comfortable in their skin, many prefer to adopt recent technologies to undergo cosmetic changes to keep up with the changing trends.

Cosmetic body contouring is gaining popularity as, many people choose to undergo this procedure. With patients looking for safer, less painful alternatives to traditional tumescent liposuction, Dr Prerna Mittal at Cocoon Refine Aesthetic Clinic, has recently upgraded to much sought after Vaser Pro to meet patients' demands for gentle body contouring procedures that produce natural looking results with minimal downtime.

An alternative to the harsh techniques of traditional liposuction, Vaser Pro uses advanced ultrasound technology designed to gently reshape the body. The sound energy is transmitted through small probes that diffuse the ultrasound waves and liquefy the fat for easy removal. The sound energy is gentle enough that it can break apart only the fat, preserving important nerves, blood vessels and connective tissues to promote smooth, predictable results with fast recovery.

Dr Sanjay Bhutani, MD, Bausch & Lomb India says, "It has always been our endeavour to provide world-class product and technologies in India. Bausch & Lomb has been marketing Vaser since 2014, with this vision. We provide only US FDA-approved

aesthetic devices to plastic surgeons and dermatologists in India. Vaser has brought liposuction into the 21st century and has amazing versatility for both fat removal and more advanced body sculpting technique. It is one of our most hot selling product in India. We are glad to partner with Cocoon Refine Aesthetic Clinic to launch our first Vaser in Ludhiana by Bausch & Lomb."

Dr Prerna Mittal, plastic surgeon says, "There has been an increasing need to feel confident to keep up to the challenges of day to day life and the need to have a positive body image of

## DR SANJAY PARASHAR

The consultant plastic surgeon from Dubai says "Vaser liposculpture is a medical technique that helps in sculpting the human body by removing fat and artistically reshaping the body."

## DR PRERNA MITTAL

She is an MBBS, MS, MCh (CMC Ludhiana) and a member of International Society of Aesthetic Plastic Surgery, American Society of Plastic Surgery & Association of Plastic Surgeons of India.

oneself cannot be overstated. Both the young and the old dream of an ultra-fit body and all the healthy benefits it entails. We are extremely happy and proud to have the first Vaser installation by Bausch & Lomb in the region."

She further added that, "It is the safest, surest and most reliable option to get rid of stubborn fat and acquire the coveted six packs, shapely pectorals and athletic outlines for your body. It is mostly a day care procedure, does not need overnight stay in the hospital and does not hamper routine activities post operatively. Ours is a clinic with international panels of doctors with

highest safety standards and protocols in place. We believe in delivering the best always."

The Vaser Lipo System is FDA-cleared for body contouring and over 100,000 procedures have been performed worldwide. Clinical studies of the procedure have demonstrated excellent results. In a recent study, blood loss during the Vaser Lipo procedure was found to be on average 7.5 times less than with traditional liposuction.
